The baseball games next Saturday afternoon on the Oahu College campus will be between the Elks and Punahous and the Kamehamehas and Maile Ilimas. Both these contests should be very close. If the Punahous show up as well as they did on Saturday last, they will give the Elks a very close rub. It must be conceded that Pitcher Babbitt, although possessed of no great curves and not very swift, pitched a very heady game against the H. A. C's. There is one thing about Mr. Babbitt-he never loses sight of the fact that there are eight other men in the team who are supposed to be out in the field for some purpose other than that of standing up to be looked at. With a good change pitcher, the Punahous would stand a good c.. ance of winning the pennant. They have one of the best infields in the league and their outfield is not to be lost sight of.

The Kamehamehas will have to do some hard work between now and next Saturday if it is their intention to make a creditable showing. There are some men on the team who seem to think that their only mission is to keep their clothes clean and their muscles from enduring too much of a strain. A baseball player who has the interests of his club at heart will at least make an attempt after a ball no matteam on Saturday afternoon.

It is certain that one man cannot do all the playing. Pitcher Lemon plays ball with his head as well as his hands and although he was a little wild

Japan Correspondence On Manchurian Affairs

Latest Sugar quotation, 3.895.

The Jiji's Peking correspondent ends another interview with the Russian Charge d'Affaires, M. Piancon, setting forth the Russian view of the Manchurian question. He says that the Russians regard Japanese, British and American settlers in Manchuria as dangerous because they have not only commercial, but also political aims, and to allow them to come in freely would imperil Russian interests. Russia has expended enormous sums of money in the pacification and devel opment of Manchuria, and has gone to an immense amount of trouble over it, and it would not be right or fair that all the benefit should be taken by others. Great Britain, the United States and Japan have done nothing to supress disorders in Manchuria, sent no o....ers nor spent any money in the estoration of orderly government, yet they now claim as much advantage as if they had done so. Japan is especialto blame because, having already been conceded the status quo in Korea, she is not even satisfied with that but clamors for more. The attitude of the powers named is gradually driving Russia to adopt a stronger course, as he moderation she has hitherto shown in regard to Manchuria seems only to cause further difficulties, and the only conclusion seems to be that down-right annexation would be the best thing.

The Kokumin's Peking correspondent also wires that Russia's attitude is at present very firm; the Russian representative in Peking has declared that Manchuria rightly belongs to Russia alone, and the other Powers have no business to concern themselves in the matter. The Chinese officials concerned are daily engaged in close conference with Prince Ching. The gravity of the situation is increasing every oment, and the prospect of immedlate recourse to arms is now much talked of among the Japanese, British and American residents. The Kokumin correspondent adds that it is now ascertained beyond doubt that there are Golden Rule Bazaar 20,000 Russian troops stationed in the
